|--|--|

RULES OF TERMINATION:

- The user exits the menu interface by entering '0' when prompted.

ALTERNATIVE CASES

- If an invalid or non-existent delivery ID is entered by the user, the system notifies the user of the invalid entry and prompts them to re-enter a valid delivery ID to proceed.

ADDITIONAL REQUIREMENTS

- Users need a valid delivery ID to access and perform actions related to delivery orders within the system.

MESSAGES:

- Success message: "Action performed successfully."
- Error message: "Invalid delivery ID entered. Please input a valid delivery ID."
