USE CASE: Veronica Elisa Martinez Contreras

|USE CASE: Navigation Menu Display

ACTORS : User   **Mode:** Online

OBJECTIVES :Display the main navigation menu options to enable users to navigate through the program.

RULES OF INITIATION:

1. Front Office User opens the application.
2. The system presents the main navigation menu upon application launch.

DESCRIPTION OF THE MAIN SCENARIO:

Actor	System
1. Front Office User is presented with the main navigation menu.	Displays the main menu options: - Option 1: Clients - Option 2: Coffee Shop - Option 3: Deliveries - Option 4: Management - Option 0: Exit

2. Front Office User selects an option from the menu.	Executes the corresponding action based on the selected option:
	  - Option 1: Redirects to the Clients Menu.
	  - Option 2: Redirects to the Coffee Shop Menu.
	  - Option 3: Redirects to the Deliveries Menu.
	  - Option 4: Redirects to the Management Menu.
	  - Option 0: Exit the application.

RULES OF TERMINATION:

- User exits the application by selecting option 0.
- Users complete their intended actions within the selected menu option.

ALTERNATIVE CASES

- If the user inputs an invalid choice, the system displays an error message and prompts for a valid input.

ADDITIONAL REQUIREMENTS:

- Ensure an intuitive and user-friendly menu interface.
- Implement robust error handling for incorrect user inputs.
- Provide appropriate navigation and redirection based on user selections.

MESSAGES:

- "Invalid choice. Please select a valid option."
- "Error: Unable to process the request. Try again later."
- "Access Denied: Permission required to access this section."
- "Invalid input detected. Please enter a number between 0 and 4."
